9. Assumption of Management of aided schools.

This is under consideration of Government.

**Recommendations made by the Educational Advisory Committee  
at its meeting on 22nd October 1946**

1. Direct payment of salary grant to the aided primary teachers—Not pressed.
2. Assumption of management of two aided schools.

This is under consideration of Government.

### APPENDIX III

(Please see answer to Question No. 274)

*Pisciculture.*—(a) 1. At Narakkal, Government have proposed to open a fish farm of 2·90 acres for experiments in the application of chemicals for fish culture. The work of the farm is now over. Fertilizer is tried from Vrischigam 1122 onwards. Results may be available by this time next year.

2. The existing fish farm at Narakkal is about 13·00 acres. This farm will be extended to the south by an addition of 17·04½ acres of which 10·55½ acres patta lands and 6·49 acres poramboke. Provision for acquisition of patta land has been sanctioned in the budget for 1122.

3. A small farm measuring 2·03½ acres in extent has also been proposed to be opened in the area to the east of the farm for experiments in fertilizer referred to as item No. 1 above so called.

4. The cattle grazing ground measuring 27·00 acres is being converted into a fish farm. Work costing Rs. 6,000 is now being done here. A laterite bund for this farm in the east at a cost of Rs. 4,000 has been proposed for sanction out of the allotment for pisciculture for this year. This farm is partly in Nayarambalam and partly in Narakkal.

(b) *Fish curing.*—A new yard has been sanctioned at a cost of Rs. 9,076 in Nayarambalam. Steps are being taken to acquire land for yard site and to construct a building for office.

(b) 2. Sanitary fish curing sheds for a few curers will be constructed at Narakkal and if possible at Nayarambalam also in 1122.

(c) *Deep Sea fishing.*—The scheme now adopted by the department for deep sea fishing is to recruit competent fishermen on monthly pay and provide them with hook and line and harpoons for deep sea fishing for sharks and drift net for other big varieties including sharks. Narakkal is the centre from where the deep sea fishing operations are directed. There are altogether 20 men now employed by the department for fishing. Of these 8 are from Narakkal and 12 from Elamgunnapuzha and Malipuram.

(d) *Socio Economic works.*—There is already a Fish Marketing Co-operative Society for the Araya fishermen of Narakkal. It is providing cheap credit facilities to needy fishermen. Now yarn distribution to the members and even outside is done through this Society. The

supply of timber for boat making at concessional rates to the members is under active consideration. Other socio economic problems are being tackled through the Society.

For the Valans of Narakkal a separate Society has been organised and the Registrar of Co-operative Societies has been requested to have the Society registered.

For Nayarambalam a Fishermen Co-operative Society has been very recently registered. It is doing for the fishermen of Nayarambalam what the Society at Narakkal does for the Narakkal fishermen. The Societies will be the media for the Government for the distribution of loans for fishing implements and for other purposes relating to the social and industrial uplift.
